

Rocky AI Founder Roadmap (12 Months)

Mission: Become an AI-powered founder who can repeatedly turn ideas into real products and businesses. Your goal is not to become a career software engineer. Your goal is to understand technology deeply enough to invent, lead, and build.

Phase 1 (Days 1–30): AI Fundamentals

- Understand LLMs
- Tokens & context windows
- Hallucinations
- RAG
- Embeddings
- APIs
- MCP
- Memory
- Function calling
- Vector databases

Goal: Explain modern AI better than 95% of business owners.

Phase 2 (Days 31–60): Build Without Coding

- ChatGPT
- Cursor
- Claude
- Replit
- GitHub Copilot
- Lovable

Ship small projects: Hair Maiden AI, travel planner, CRM, rental dashboard.

Phase 3 (Days 61–105): Learn Just Enough Code

- Python basics
- JavaScript basics
- Git/GitHub
- Debug AI-generated code

Goal: Read and modify code confidently.

Phase 4 (Days 106–165): AI Agents

- Agent orchestration

- Memory
- Planning
- Voice AI
- Automation
- Tool use

Build specialized agents for marketing, sales, finance, customer support, and travel.

Phase 5 (Days 166–255): Personal Operating System

- Connect Gmail
- Calendar
- Tasks
- Business metrics
- Inventory
- Travel
- Finance

Create one AI dashboard that prioritizes your life.

Phase 6 (Days 256–365): Founder Mastery

- Systems design
- Cybersecurity
- Databases
- Cloud
- Hiring engineers
- Product strategy

Lead technical teams and build companies.

Weekly Schedule (10–15 hrs/week)

- Monday (2h): AI concepts
- Tuesday (2h): Build a real project
- Wednesday (2h): Python & JavaScript
- Thursday (2h): AI agents & automation
- Friday (1h): Read papers/news
- Weekend (2–6h): Ship one improvement or prototype

North Star: Every month, launch or meaningfully improve one real product. Focus on solving important problems—not collecting tutorials.
